

Eyelash Extensions

Before

Before your appointment we recommend the following:

- Try to avoid caffeine intake 3-4 hours before your lash appointment as caffeine can result in your natural lashes moving a lot.
- Avoid make up around the eye area.
- No mascara before your appointment. Some mascaras can be very strong or waterproof which can result in us spending more time getting your mascara off
- Avoid using oil based products on your eye area before your appointment.
- Arrive on time (being late can result in less time to apply the lash extensions.)
- It is always good to wash your hair sometime beforehand so you can avoid getting your lashes wet within the first 24-48 hours.

Eyelash Extensions

After

After your appointment we recommend you avoid the following:

- Avoid water and steam for 24-48 hours after your appointment.
- Do not use oil based products on your lashes or around the eye area. Use oil free makeup remover and a cotton bud around the eyes.
- Avoid sleeping on your lashes for longer wear.
- Brush your lashes daily.
- Do not tug or pull the lashes. This can damage your natural lashes and cause them to come out with the lash extension.
- No tinting and perming should be done on top of your lash extensions.
- To dry your lashes blink onto a tissue or use a hair dryer/fan.
- Wash your lashes with a foam cleanser if highly recommended.
- Please let us know if you feel any discomfort.
- Any oil based products may stop your lashes from lashing. If you follow the instructions you should get a good few weeks.
- We recommend keeping your lashes clean and healthy.
